

TRAINING DESIGN DOCUMENT

When Employees Need Support

A Supervisor's Guide to Workplace Accommodations

ADA | PWFA | PUMP Act | Title VII | Interactive eLearning Module

SECTION 01

Executive Summary

This document describes the instructional design, development methodology, and implementation plan for *When Employees Need Support*, an interactive scenario-based eLearning module designed for supervisors and managers navigating employee accommodation requests. The module addresses obligations under the Americans with Disabilities Act (ADA), the Pregnant Workers Fairness Act (PWFA), the PUMP Act (Providing Urgent Maternal Protections for Nursing Mothers Act), and Title VII of the Civil Rights Act.

The module was developed as a standalone, self-contained HTML asset deployable via GitHub Pages, Learning Management Systems, or SharePoint. It requires no proprietary authoring tools, no backend infrastructure, and no licensing fees.

At a Glance

Format	Interactive HTML5 eLearning module
Duration	45 to 60 minutes (estimated)
Audience	Supervisors and managers across all industries
Legal Coverage	ADA, PWFA, PUMP Act, Title VII
Scenarios	Six scenario-based modules with unique characters and situations
Interactivity	Branching scenarios, consequence scenes, six knowledge checks, certificate of completion
Delivery	Browser-based, no LMS required (SCORM-ready with minor adaptation)
Branding	Institution-neutral; adaptable to any organization

SECTION 02

Training Purpose and Organizational Need

Accommodation requests are among the most legally consequential interactions a supervisor will have with a direct report. Despite this, formal training at the supervisory level remains inconsistent across organizations. Most supervisors understand they should involve HR or a Coordinator, but lack the specific knowledge to act correctly in the moment.

The consequences of supervisor missteps are significant. Probing for a diagnosis, implementing informal fixes, sharing medical information, delaying action, or discouraging an employee from requesting an accommodation can each constitute independent violations, regardless of intent or outcome.

The Gap This Training Addresses

- Supervisors do not recognize that a disclosure has triggered their obligations, particularly when employees do not use formal language.
- Supervisors attempt to evaluate or resolve requests themselves, bypassing the interactive process.
- Supervisors ask medically inappropriate questions or share protected information in good faith, without understanding the legal exposure.
- PWFA and PUMP Act obligations are frequently unknown or misunderstood at the supervisory level.
- Organizations lack a scalable, cost-effective training solution covering all four legal frameworks in a single module.

Design Principle: Behavior Change Over Awareness

This module was designed not to inform supervisors that accommodations exist, but to change what they do in the 60 seconds after an employee walks into their office. Every scenario, choice, and consequence scene is anchored in that specific behavioral goal.

SECTION 03

Learning Objectives

Learning objectives were developed using Bloom's Taxonomy, targeting the Apply and Analyze levels. The module is designed to move learners from knowing the rule to demonstrating the correct behavior under realistic conditions.

Bloom's Level	Objective	Assessment Method
Recognize (Understand)	Identify when an employee disclosure triggers the duty to act, even without formal language.	Branching scenario, Scenarios 01 and 05
Distinguish (Analyze)	Differentiate between supervisor responsibilities and Coordinator responsibilities in the interactive process.	Knowledge Checks 02, 03, 05
Apply (Apply)	Select the correct supervisory response when an employee discloses a need across ADA, PWFA, PUMP Act, and Title VII contexts.	Branching scenarios, all six modules
Apply (Apply)	Respond appropriately to team questions about an accommodation without disclosing protected information.	Knowledge Check 01, Scenario 04
Analyze (Analyze)	Recognize when a performance situation requires pausing to engage the accommodation process before proceeding with discipline.	Scenario 04 branching decision
Remember (Knowledge)	Identify at least three actions supervisors must not take when an employee requests an accommodation.	Do/Do Not slides across all scenarios

SECTION 04

Target Audience

The primary audience is first- and mid-level supervisors and managers in any organizational context where employees may request workplace accommodations. The module assumes no prior knowledge of ADA, PWFA, PUMP Act, or Title VII requirements.

Audience Analysis

Variable	Profile
Role	Supervisors and managers with direct reports
Prior knowledge	General awareness of HR processes; no assumed legal expertise
Motivation	Moderate to low intrinsic; compliance-driven context
Technology	Desktop or laptop browser; variable mobile access
Time available	45 to 60 minutes, potentially across multiple sittings
Barriers	Compliance fatigue; low perceived relevance; distrust of legalistic training tone; unfamiliarity with PWFA and PUMP Act as newer legal frameworks

Design Response to Audience Barriers

The warm, lightly humorous tone was a deliberate instructional choice. Each supervisor character is written to be recognizable rather than villainous: well-intentioned people who stumble for the same reasons most supervisors do. This framing invites identification rather than defensiveness, which research on compliance training consistently shows improves behavioral transfer.

SECTION 05

Instructional Design Methodology

This module was designed using an integration of three complementary frameworks: the ADDIE model for process structure, Merrill's Principles of Instruction for learning activity design, and Cognitive Load Theory for content sequencing and interface design.

ADDIE Framework

Phase	Key Decisions Made
Analyze	Identified supervisor behavior gaps across ADA, PWFA, PUMP Act, and Title VII; defined audience profile; confirmed legal frameworks and common violation patterns.
Design	Selected scenario-based branching format; mapped objectives to Bloom's levels; designed six character pairs with Dr. Patel as the constant Coordinator; chose institution-neutral framing for reusability.
Develop	Built as self-contained HTML5 with vanilla JavaScript; scenario selector hub with completion gating; personalized certificate of completion; no framework dependencies.
Implement	Deployed via GitHub Pages at training.brightsteadconsulting.com ; embeddable via iframe in SharePoint or any LMS.
Evaluate	Knowledge check scoring with per-question feedback; completion certificate as documented proof; formal evaluation plan in Section 16.

Merrill's Principles of Instruction

MPI emphasizes that effective instruction is problem-centered and proceeds through activation, demonstration, application, and integration. Each principle maps to a specific module component across all six scenarios:

Problem-Centered

Each scenario opens with a realistic workplace situation rather than a policy statement. Learners engage with the character's problem before receiving any instructional content.

Activation

Each scenario is grounded in a recognizable supervisory moment. Most supervisors have navigated an awkward personal conversation with a direct report. The scenarios are designed to feel familiar.

Demonstration

Each scenario includes a consequence scene showing what goes wrong when supervisors improvise, and a Dr. Patel scene modeling the correct process.

Application

The branching choice point and knowledge check question in each scenario require learners to apply content, not recall it. Per-choice feedback provides immediate corrective information.

Integration

The completion certificate and hub progress tracker reinforce cumulative achievement and connect module content to a documented professional accomplishment.

Cognitive Load Theory

CLT informed several interface and sequencing decisions aimed at reducing extraneous cognitive load:

- The scenario hub allows learners to complete scenarios in any order, reducing the cognitive burden of forced linear progression through unfamiliar content.
- Characters are introduced with visual avatars and role labels before speaking, reducing the effort required to track speakers.
- Dr. Patel appears in every scenario, providing a consistent cognitive anchor across six different contexts.
- Knowledge check feedback is specific and corrective for each distractor, not generic.
- The visual design uses a minimal palette and consistent typographic hierarchy to reduce interface noise.

SECTION 06

Tools and Technology

A core design constraint for this project was zero proprietary tooling dependency. The module is fully reproducible, auditable, and modifiable by any developer with basic HTML and JavaScript knowledge, without software licenses.

Tool / Technology	Role in Project	Rationale
HTML5 / CSS3	Module structure, layout, and visual design	Universal browser support; no build tools required
Vanilla JavaScript	Interactivity, branching logic, score tracking, certificate generation	No framework dependencies; lightweight and maintainable
Google Fonts	Typography system (DM Sans and DM Serif Display)	Professional, readable, distinct from default browser fonts
localStorage API	Score and completion tracking without a backend	No server infrastructure required for basic tracking
GitHub / GitHub Pages	Version control and free static hosting	Zero hosting cost; public URL; update via commit
Hostinger / Custom DNS	Custom subdomain routing to GitHub Pages	Professional branded URL at training.brightsteadconsulting.com

SECTION 07

Module Architecture and Content Outline

The module consists of a welcome screen, a scenario hub, six scenario tracks, and a certificate screen. Each scenario track contains seven slides. Navigation within scenarios is linear with one branching decision point per scenario. All branches return to the main learning path after delivering consequence feedback.

Global Structure

Screen	Content	Type
Welcome	Learner name input, module overview, learning objectives	Intake / Orientation
Scenario Hub	Six scenario cards with locked/complete states and progress bar	Navigation / Gating
Scenarios 01-06	Seven slides each: intro, two dialogue scenes, choice, reference, dialogue, knowledge check	Learning Sequence
Certificate	Personalized certificate with score summary and print option	Completion / Transfer

Per-Scenario Slide Structure

Slide	Type	Content
01	Introduction	Scenario title, characters, context-setting narrative
02	Dialogue	Opening scene: employee discloses or requests
03	Branching Choice	Four-option decision point with per-choice feedback
04	Consequence Scene	Alternate-universe negative model showing what goes wrong
05	Reference	Do/Do Not slide for the relevant legal framework
06	Dialogue	Dr. Patel models the correct process
07	Knowledge Check	Single question, must be answered correctly to complete

Scenario Roster

Scenario	Title	Law	Characters
01	Employee Discloses a Need	ADA / PWFA	Marcus, Jordan, Dr. Patel

02	Religious Accommodation Request	Title VII	Diana, Tariq, Dr. Patel
03	Return from Leave with Restrictions	ADA / FMLA	Greg, Simone, Dr. Patel
04	Performance Intersects with Disability	ADA	Carmen, Devon, Dr. Patel
05	Leave for a Pregnancy-Related Condition	PWFA	Rafael, Priya, Dr. Patel
06	Postpartum Lactation Accommodations	PWFA / PUMP Act	Keisha, Amara, Dr. Patel

SECTION 08

Storyboard: Scenario 01: Employee Discloses a Need

SCENARIO 1

Scenario 01: Employee Discloses a Need

ADA / PWFA

Marcus (Supervisor), Jordan (Staff), Dr. Patel (ADA Coordinator)

SLIDE 01

Introduction and Characters

SCREEN / VISUAL

Title card with scenario number, title, and three character avatars with name and role labels. Context narrative below.

LEARNER ACTION

Read only. Click Continue.

NARRATION / ON-SCREEN TEXT

Marcus is a department supervisor. Jordan approaches him about a health-related need for changes at work. Pay attention to what Jordan says and what Marcus does next.

LEARNING OBJECTIVE ADDRESSED

Sets context. Activates prior experience with personal supervisory conversations.

SLIDE 02

Scene 1: The Hallway Conversation

SCREEN / VISUAL

Dialogue scene with speech bubbles. Jordan left, Marcus right. Warning callout below dialogue.

LEARNER ACTION

Read and observe. Click Continue.

NARRATION / ON-SCREEN TEXT

Jordan: I have been dealing with some health stuff. My doctor thinks I might need some changes to how I am working. Marcus: Is it serious? What kind of health stuff? Jordan: I would rather not get into details. Warning: Jordan did not use the words ADA or accommodation. That does not matter.

LEARNING OBJECTIVE ADDRESSED

LO1: Recognize when a disclosure triggers the duty to act.

SLIDE 03

Branching Choice: What Should Marcus Do?

SCREEN / VISUAL

Four-option multiple choice with card buttons. Immediate per-choice feedback. Correct option highlighted green, incorrect red.

LEARNER ACTION

Select one option. Read feedback. Next unlocks after selection.

NARRATION / ON-SCREEN TEXT

Option A: Ask for a doctor's note first. Option B: Tell Jordan HR handles this and move on. Option C: Thank Jordan and refer to the ADA Coordinator right away. Option D: Offer to move Jordan's desk. Correct: C.

LEARNING OBJECTIVE ADDRESSED

LO3: Apply the correct supervisory response when an employee discloses a need.

SLIDE 04

Scene 2: Marcus Improvises (Negative Model)

SCREEN / VISUAL

Dialogue scene. Narrator frames the alternate universe. Danger callout identifies two errors.

LEARNER ACTION

Read and observe. Click Continue.

NARRATION / ON-SCREEN TEXT

Marcus probes for permanence and diagnosis. Jordan declines to share. Danger callout: Marcus asked about the condition and tried to evaluate the request himself. Both are outside his role.

LEARNING OBJECTIVE ADDRESSED

LO5: Identify actions supervisors must not take.

SLIDE 05

Do/Do Not Reference

SCREEN / VISUAL

Two-panel reference layout. Green panel with five DO items. Red panel with five DO NOT items. Icon-supported bullets.

LEARNER ACTION

Read and review. Click Continue.

NARRATION / ON-SCREEN TEXT

DO: Express support, refer promptly, maintain confidentiality, cooperate with Coordinator. DO NOT: Ask for diagnosis, evaluate eligibility, implement informal fixes, share medical info, delay.

LEARNING OBJECTIVE ADDRESSED

LO5: Identify at least three actions supervisors must not take.

SLIDE 06

Scene 3: Dr. Patel Steps In (Positive Model)

SCREEN / VISUAL

Three-character dialogue. Dr. Patel calls Marcus. Models what Coordinator needs and what Marcus should not share with team.

LEARNER ACTION

Read and observe. Click Continue.

NARRATION / ON-SCREEN TEXT

Dr. Patel requests essential functions and scheduling flexibility. Confirms eligibility is her determination. Instructs Marcus not to communicate to team without Coordinator involvement.

LEARNING OBJECTIVE ADDRESSED

LO2: Distinguish supervisor and Coordinator responsibilities.

SLIDE 07

Knowledge Check

SCREEN / VISUAL

Single question, four options. Per-choice feedback. Must answer correctly to complete scenario.

LEARNER ACTION

Select one answer. Read feedback. Click Complete Scenario.

NARRATION / ON-SCREEN TEXT

An employee requests Fridays off with no diagnosis mentioned. Correct answer: Refer to the ADA Coordinator. The request does not require formal language.

LEARNING OBJECTIVE ADDRESSED

LO1: Recognize when a disclosure triggers the duty to act.

SECTION 09

Storyboard: Scenario 02: Religious Accommodation Request

SCENARIO 2

Scenario 02: Religious Accommodation Request

Title VII

Diana (Manager), Tariq (Staff), Dr. Patel (Accommodations Coordinator)

SLIDE 01

Introduction and Characters

SCREEN / VISUAL

Title card with scenario number, characters, and context narrative.

LEARNER ACTION

Read only. Click Continue.

NARRATION / ON-SCREEN TEXT

Diana is a team manager. Tariq has a scheduling conflict with his religious observance and the new Friday all-hands meeting. What Diana does next matters more than she realizes.

LEARNING OBJECTIVE ADDRESSED

Sets context. Activates awareness of Title VII as a framework distinct from ADA.

SLIDE 02

Scene 1: Tariq Raises a Scheduling Concern

SCREEN / VISUAL

Dialogue scene. Tariq left, Diana right. Warning callout below.

LEARNER ACTION

Read and observe. Click Continue.

NARRATION / ON-SCREEN TEXT

Tariq explains that he observes the Sabbath starting at sundown on Fridays, which conflicts with the new all-hands time. Diana's initial response questions whether he can attend part of it. Warning: Tariq has made a religious accommodation request under Title VII.

LEARNING OBJECTIVE ADDRESSED

LO1: Recognize when a request triggers accommodation obligations.

SLIDE 03

Branching Choice: What Should Diana Do?

SCREEN / VISUAL

Four-option multiple choice with immediate per-choice feedback.

LEARNER ACTION

Select one option. Read feedback. Next unlocks.

NARRATION / ON-SCREEN TEXT

Option A: Tell Tariq the time cannot change. Option B: Move the meeting to Thursday for everyone. Option C: Thank Tariq and refer to the Accommodations Coordinator. Option D: Tell Tariq she will think about it next month. Correct: C.

LEARNING OBJECTIVE ADDRESSED

LO3: Apply the correct supervisory response to a religious accommodation request.

SLIDE 04

Scene 2: Diana Handles It Herself (Negative Model)

SCREEN / VISUAL

Dialogue scene. Danger callout identifies three problems.

LEARNER ACTION

Read and observe. Click Continue.

NARRATION / ON-SCREEN TEXT

Diana tells Tariq to leave early when needed and catch the recording. She frames it as informal with no process. Danger callout: no formal process, informal fix may not meet the need, unpredictability burdens Tariq's practice.

LEARNING OBJECTIVE ADDRESSED

LO5: Identify actions supervisors must not take in a Title VII context.

SLIDE 05

Do/Do Not Reference: Title VII

SCREEN / VISUAL

Two-panel reference layout specific to religious accommodation.

LEARNER ACTION

Read and review. Click Continue.

NARRATION / ON-SCREEN TEXT

DO: Refer promptly, maintain confidentiality, cooperate with Coordinator on scheduling. DO NOT: Unilaterally deny, create informal arrangements, ask employee to prove sincerity, assume you know what is reasonable.

LEARNING OBJECTIVE ADDRESSED

LO5: Apply Title VII obligations at the supervisory level.

SLIDE 06

Scene 3: Dr. Patel Finds a Path

SCREEN / VISUAL

Dialogue. Dr. Patel presents three accommodation options to Diana and asks about operational impact.

LEARNER ACTION

Read and observe. Click Continue.

NARRATION / ON-SCREEN TEXT

Dr. Patel offers earlier start time, full recording with summary, or excused absence with structured catch-up. Diana confirms what creates undue hardship. Dr. Patel will finalize with Tariq.

LEARNING OBJECTIVE ADDRESSED

LO2: Distinguish supervisor and Coordinator responsibilities under Title VII.

SLIDE 07

Knowledge Check

SCREEN / VISUAL

Single question. Must answer correctly to complete.

LEARNER ACTION

Select one answer. Read feedback. Click Complete Scenario.

NARRATION / ON-SCREEN TEXT

Employee needs a religious holiday off; the organization has it scheduled as a regular workday. Correct answer: Refer to the Accommodations Coordinator to engage the interactive process.

LEARNING OBJECTIVE ADDRESSED

LO3: Apply correct Title VII response to a specific scenario.

SECTION 10

Storyboard: Scenario 03: Return from Leave with Restrictions

SCENARIO 3

Scenario 03: Return from Leave with Restrictions

ADA / FMLA

Greg (Supervisor), Simone (Staff), Dr. Patel (ADA Coordinator)

SLIDE 01

Introduction and Characters

SCREEN / VISUAL

Title card with context narrative. Greg uncertain about FMLA return paperwork.

LEARNER ACTION

Read only. Click Continue.

NARRATION / ON-SCREEN TEXT

Greg is a facilities supervisor. Simone has returned from FMLA leave with a doctor's note restricting lifting and requiring alternating sit/stand. Greg is not sure what to do with the paperwork.

LEARNING OBJECTIVE ADDRESSED

Sets context. Activates awareness of return-from-leave obligations.

SLIDE 02

Scene 1: Simone Returns

SCREEN / VISUAL

Dialogue scene. Warning callout flags the dual obligation.

LEARNER ACTION

Read and observe. Click Continue.

NARRATION / ON-SCREEN TEXT

Simone presents restrictions: no lifting over 15 pounds, alternating sit/stand every 45 minutes. Greg notes much of her role involves lifting. Warning: This is both an FMLA return and a potential ADA accommodation request. The interactive process applies.

LEARNING OBJECTIVE ADDRESSED

LO1: Recognize return-from-leave with restrictions as triggering accommodation obligations.

SLIDE 03

Branching Choice: What Should Greg Do?

SCREEN / VISUAL

Four-option multiple choice.

LEARNER ACTION

Select one option. Read feedback. Next unlocks.

NARRATION / ON-SCREEN TEXT

Option A: Tell Simone she cannot return until restrictions are lifted. Option B: Accept the note and contact the ADA Coordinator. Option C: Redistribute duties informally without explanation. Option D: File the note and wait. Correct: B.

LEARNING OBJECTIVE ADDRESSED

LO3: Apply correct supervisory response to a return-from-leave accommodation request.

SLIDE 04

Scene 2: Greg Goes It Alone (Negative Model)

SCREEN / VISUAL

Dialogue scene. Danger callout identifies absence of documentation and protection.

LEARNER ACTION

Read and observe. Click Continue.

NARRATION / ON-SCREEN TEXT

Greg assigns Simone to front desk informally with no documentation. When Simone asks about protection if things change, Greg cannot answer. Danger callout: no documentation, no Coordinator, no certainty.

LEARNING OBJECTIVE ADDRESSED

LO5: Identify risks of informal accommodation arrangements.

SLIDE 05

Do/Do Not Reference: Return from Leave

SCREEN / VISUAL

Two-panel reference specific to ADA and FMLA return obligations.

LEARNER ACTION

Read and review. Click Continue.

NARRATION / ON-SCREEN TEXT

DO: Accept documentation without interrogation, refer to Coordinator, cooperate on job functions, document through formal process. DO NOT: Refuse return without exploring accommodations, create informal arrangements, share restrictions with colleagues beyond operational necessity.

LEARNING OBJECTIVE ADDRESSED

LO5: Apply ADA and FMLA return obligations at the supervisory level.

SLIDE 06

Scene 3: Dr. Patel and Greg Work Through It

SCREEN / VISUAL

Dialogue. Dr. Patel gathers operational context and identifies temporary redistribution as feasible accommodation.

LEARNER ACTION

Read and observe. Click Continue.

NARRATION / ON-SCREEN TEXT

Dr. Patel asks which duties involve lifting over 15 pounds. Greg confirms floor inspection transport is the main requirement. Dr. Patel identifies temporary redistribution as feasible and documents a 90-day accommodation with review.

LEARNING OBJECTIVE ADDRESSED

LO2: Distinguish supervisor and Coordinator roles in return-from-leave accommodations.

SLIDE 07

Knowledge Check

SCREEN / VISUAL

Single question. Must answer correctly to complete.

LEARNER ACTION

Select one answer. Read feedback. Click Complete Scenario.

NARRATION / ON-SCREEN TEXT

Employee returns with a standing restriction. First step: Accept documentation and refer to the ADA Coordinator to start the interactive process. Not: refuse return, purchase equipment informally, or contact the doctor.

LEARNING OBJECTIVE ADDRESSED

LO3: Apply correct first step when an employee returns with medical restrictions.

SECTION 11

Storyboard: Scenario 04: Performance Intersects with Disability

SCENARIO 4

Scenario 04: Performance Intersects with Disability

ADA

Carmen (Program Director), Devon (Program Coordinator), Dr. Patel (ADA Coordinator)

SLIDE 01

Introduction and Characters

SCREEN / VISUAL

Title card. Context narrative sets up the performance-accommodation collision.

LEARNER ACTION

Read only. Click Continue.

NARRATION / ON-SCREEN TEXT

Carmen is about to begin a performance improvement process with Devon when Devon discloses a recent diagnosis affecting concentration and processing speed. The two tracks collide mid-meeting.

LEARNING OBJECTIVE ADDRESSED

Sets context. Activates awareness of the legally complex intersection of performance and disability.

SLIDE 02

Scene 1: Devon Discloses During a Performance Meeting

SCREEN / VISUAL

Dialogue scene. Warning callout flags the two-track collision.

LEARNER ACTION

Read and observe. Click Continue.

NARRATION / ON-SCREEN TEXT

Carmen raises three missed deadlines. Devon discloses a condition affecting concentration. Carmen is uncertain how the disclosure affects the performance process. Warning: Two legally distinct tracks have collided. Carmen cannot proceed as if the disclosure did not happen.

LEARNING OBJECTIVE ADDRESSED

LO1: Recognize when a disability disclosure requires pausing the performance process.

SLIDE 03

Branching Choice: What Should Carmen Do Now?

SCREEN / VISUAL

Four-option multiple choice.

LEARNER ACTION

Select one option. Read feedback. Next unlocks.

NARRATION / ON-SCREEN TEXT

Option A: Continue the performance conversation as planned. Option B: Issue the written warning today. Option C: Pause, thank Devon, and refer to the ADA Coordinator before taking disciplinary action. Option D: Tell Devon the accommodation process will take too long and issue a warning to preserve the record. Correct: C.

LEARNING OBJECTIVE ADDRESSED

LO3 and LO4: Apply correct response when performance and disability intersect.

SLIDE 04

Scene 2: Carmen Presses Forward (Negative Model)

SCREEN / VISUAL

Dialogue scene. Danger callout identifies the timing problem.

LEARNER ACTION

Read and observe. Click Continue.

NARRATION / ON-SCREEN TEXT

Carmen issues the warning the same day as the disclosure, telling Devon to raise the accommodation issue with HR separately. Danger callout: same-day discipline after disclosure creates the appearance of retaliation regardless of the prior record.

LEARNING OBJECTIVE ADDRESSED

LO5: Identify the legal risk of issuing discipline immediately after a disability disclosure.

SLIDE 05

Do/Do Not Reference: Performance and Disability

SCREEN / VISUAL

Two-panel reference specific to ADA performance intersection.

LEARNER ACTION

Read and review. Click Continue.

NARRATION / ON-SCREEN TEXT

DO: Pause disciplinary action, refer to Coordinator, allow accommodation process to run before resuming, consult HR. DO NOT: Issue discipline immediately after disclosure, run both tracks simultaneously without Coordinator, assume performance issues are unrelated to disability without exploration.

LEARNING OBJECTIVE ADDRESSED

LO5: Apply ADA obligations when performance and disability intersect.

SLIDE 06

Scene 3: Dr. Patel Sequences the Two Tracks

SCREEN / VISUAL

Dialogue. Dr. Patel explains how to sequence accommodation and performance processes correctly.

LEARNER ACTION

Read and observe. Click Continue.

NARRATION / ON-SCREEN TEXT

Dr. Patel explains that the accommodation process must assess whether the identified condition caused the performance issues. If accommodation would have prevented them, performance action must wait. If issues persist with accommodation in place, performance track can resume.

LEARNING OBJECTIVE ADDRESSED

LO2: Understand the sequencing relationship between accommodation and performance processes.

SLIDE 07

Knowledge Check

SCREEN / VISUAL

Single question. Must answer correctly to complete.

LEARNER ACTION

Select one answer. Read feedback. Click Complete Scenario.

NARRATION / ON-SCREEN TEXT

About to issue a written warning when employee discloses a chronic condition. Correct answer: Pause, thank the employee, and refer to the ADA Coordinator before taking further action.

LEARNING OBJECTIVE ADDRESSED

LO3: Apply correct response when a disability disclosure interrupts a performance process.

SECTION 12

Storyboard: Scenario 05: Leave for a Pregnancy-Related Condition

SCENARIO 5

Scenario 05: Leave for a Pregnancy-Related Condition

PWFA

Rafael (Shift Supervisor), Priya (Staff), Dr. Patel (Accommodations Coordinator)

SLIDE 01

Introduction and Characters

SCREEN / VISUAL

Title card. Context narrative establishes Rafael's unfamiliarity with PWFA.

LEARNER ACTION

Read only. Click Continue.

NARRATION / ON-SCREEN TEXT

Rafael is a shift supervisor. Priya is experiencing pregnancy complications and approaches him about needing intermittent leave. Rafael has never dealt with a PWFA request before.

LEARNING OBJECTIVE ADDRESSED

Sets context. Activates awareness of PWFA as a distinct legal framework from ADA.

SLIDE 02

Scene 1: Priya Requests Intermittent Leave

SCREEN / VISUAL

Dialogue scene. Warning callout clarifies PWFA applicability.

LEARNER ACTION

Read and observe. Click Continue.

NARRATION / ON-SCREEN TEXT

Priya discloses pregnancy complications and requests intermittent leave of a day or two at a time when symptoms are severe. Rafael notes staffing concerns. Warning: The PWFA applies. Intermittent leave is a recognized accommodation. Staffing concerns do not delay the referral obligation.

LEARNING OBJECTIVE ADDRESSED

LO1: Recognize a PWFA accommodation request and the duty to respond.

SLIDE 03

Branching Choice: What Should Rafael Do?

SCREEN / VISUAL

Four-option multiple choice.

LEARNER ACTION

Select one option. Read feedback. Next unlocks.

NARRATION / ON-SCREEN TEXT

Option A: Tell Priya he cannot guarantee shift coverage and she should think carefully. Option B: Thank Priya and refer to the Accommodations Coordinator right away. Option C: Tell Priya to use PTO for now and formalize later. Option D: Ask for full medical records to evaluate the request. Correct: B.

LEARNING OBJECTIVE ADDRESSED

LO3: Apply correct supervisory response to a PWFA accommodation request.

SLIDE 04

Scene 2: Rafael Improvises (Negative Model)

SCREEN / VISUAL

Dialogue scene. Danger callout identifies discouragement and delay as violations.

LEARNER ACTION

Read and observe. Click Continue.

NARRATION / ON-SCREEN TEXT

Rafael suggests the schedule may not be realistic for Priya, borders on encouraging her to reconsider working, and delays without referring. When Priya asks about a formal process, Rafael defers. Danger callout: discouragement and delay are legally consequential under the PWFA.

LEARNING OBJECTIVE ADDRESSED

LO5: Identify discouragement and delay as potential PWFA violations.

SLIDE 05

Do/Do Not Reference: PWFA

SCREEN / VISUAL

Two-panel reference specific to PWFA obligations.

LEARNER ACTION

Read and review. Click Continue.

NARRATION / ON-SCREEN TEXT

DO: Refer to Coordinator immediately, treat with same urgency as ADA, express support, cooperate on scheduling. DO NOT: Discourage request by citing operational concerns, suggest employee reconsider role, ask for more medical detail than Coordinator requests, delay because of staffing.

LEARNING OBJECTIVE ADDRESSED

LO5: Apply PWFA obligations at the supervisory level.

SLIDE 06

Scene 3: Dr. Patel Navigates the Process

SCREEN / VISUAL

Dialogue. Dr. Patel gathers scheduling context and clarifies the undue hardship standard under PWFA.

LEARNER ACTION

Read and observe. Click Continue.

NARRATION / ON-SCREEN TEXT

Dr. Patel explains that staffing difficulty alone does not constitute undue hardship under the PWFA without a more substantial showing. She gathers on-call pool and overtime information from Rafael and commits to exploring all options.

LEARNING OBJECTIVE ADDRESSED

LO2: Understand the PWFA interactive process and the undue hardship standard.

SLIDE 07**Knowledge Check****SCREEN / VISUAL**

Single question. Must answer correctly to complete.

LEARNER ACTION

Select one answer. Read feedback. Click Complete Scenario.

NARRATION / ON-SCREEN TEXT

Pregnant employee's doctor restricts lifting over 20 pounds. Department requires regular lifting. First step: Refer to the Accommodations Coordinator to begin the interactive process under the PWFA. Not: place on unpaid leave, redistribute informally, or probe the severity of the pregnancy.

LEARNING OBJECTIVE ADDRESSED

LO3: Apply correct first step for a PWFA accommodation request.

SECTION 13

Storyboard: Scenario 06: Postpartum Lactation Accommodations

SCENARIO 6

Scenario 06: Postpartum Lactation Accommodations

PWFA / PUMP Act

Keisha (Project Manager), Amara (Project Coordinator), Dr. Patel (Accommodations Coordinator)

SLIDE 01

Introduction and Characters

SCREEN / VISUAL

Title card. Context narrative establishes Keisha's supportive intent and knowledge gap.

LEARNER ACTION

Read only. Click Continue.

NARRATION / ON-SCREEN TEXT

Keisha is a project manager. Amara has returned from parental leave and needs time and a private space to pump breast milk during the workday. Keisha wants to help but is not sure what the organization is legally required to provide.

LEARNING OBJECTIVE ADDRESSED

Sets context. Introduces the PUMP Act as a framework many supervisors are unfamiliar with.

SLIDE 02

Scene 1: Amara Raises a Practical Need

SCREEN / VISUAL

Dialogue scene. Warning callout identifies the two applicable laws.

LEARNER ACTION

Read and observe. Click Continue.

NARRATION / ON-SCREEN TEXT

Amara requests a private non-bathroom space and schedule flexibility for two daily pumping breaks. Keisha is supportive but vague about the process. Warning: The PWFA and PUMP Act both apply. Employers must provide reasonable break time and a private non-bathroom space. This is not discretionary.

LEARNING OBJECTIVE ADDRESSED

LO1: Recognize a PUMP Act accommodation request and the applicable legal framework.

SLIDE 03

Branching Choice: What Should Keisha Do?

SCREEN / VISUAL

Four-option multiple choice.

LEARNER ACTION

Select one option. Read feedback. Next unlocks.

NARRATION / ON-SCREEN TEXT

Option A: Tell Amara to use available conference rooms as needed. Option B: Refer Amara to the Accommodations Coordinator who will confirm the space and formalize the breaks. Option C: Send Amara to building management. Option D: Ask how long she plans to breastfeed before deciding. Correct: B.

LEARNING OBJECTIVE ADDRESSED

LO3: Apply correct supervisory response to a lactation accommodation request.

SLIDE 04

Scene 2: The Informal Route Goes Wrong (Negative Model)

SCREEN / VISUAL

Dialogue scene. Danger callout explains why good intentions are not enough.

LEARNER ACTION

Read and observe. Click Continue.

NARRATION / ON-SCREEN TEXT

Keisha books a conference room informally. It gets double-booked twice in the first week. Amara misses pumping sessions. Danger callout: under the PUMP Act, the employer must ensure access to a private non-bathroom space. A conference room that gets bumped is not compliant.

LEARNING OBJECTIVE ADDRESSED

LO5: Identify why informal conference room arrangements do not satisfy PUMP Act obligations.

SLIDE 05

Do/Do Not Reference: PWFA and PUMP Act

SCREEN / VISUAL

Two-panel reference specific to lactation accommodation obligations.

LEARNER ACTION

Read and review. Click Continue.

NARRATION / ON-SCREEN TEXT

DO: Refer to Coordinator, know organization must provide private non-bathroom space and reasonable break time, treat with seriousness, follow up if accommodation is not working. DO NOT: Offer conference rooms as a substitute, ask about breastfeeding duration, send to facilities only, allow arrangement to become unreliable.

LEARNING OBJECTIVE ADDRESSED

LO5: Apply PWFA and PUMP Act obligations at the supervisory level.

SLIDE 06

Scene 3: Dr. Patel Makes It Official

SCREEN / VISUAL

Dialogue. Dr. Patel confirms the designated lactation room and formalizes the break schedule.

LEARNER ACTION

Read and observe. Click Continue.

NARRATION / ON-SCREEN TEXT

Dr. Patel confirms the designated lactation room details and sends Amara the booking link and access code. She formalizes 10 and 2 as protected breaks and instructs Keisha to block them on the team calendar. She tells both parties to contact her directly if any problem arises.

LEARNING OBJECTIVE ADDRESSED

LO2: Understand the Coordinator's role in formalizing lactation accommodations.

SLIDE 07**Knowledge Check****SCREEN / VISUAL**

Single question. Must answer correctly to complete.

LEARNER ACTION

Select one answer. Read feedback. Click Complete Scenario.

NARRATION / ON-SCREEN TEXT

Postpartum employee needs to pump twice daily and asks for a private space. Correct answer: Refer to the Accommodations Coordinator who will confirm the designated space and formalize the break schedule. Not: bathroom with a lock, pump before/after shift, or informal conference room.

LEARNING OBJECTIVE ADDRESSED

LO3: Apply correct supervisory response to a PUMP Act accommodation request.

SECTION 14

Assessment and Knowledge Check Design

The module uses two forms of embedded assessment per scenario: a branching decision point and a knowledge check question. Both are formative. The goal is corrective feedback during the learning experience, not high-stakes gatekeeping.

Completion Gating

Learners must answer the knowledge check question correctly to mark a scenario as complete. An incorrect answer returns a retry screen allowing the learner to review the scenario and attempt the knowledge check again. All six scenarios must be passed to unlock the certificate.

Distractor Design

Each incorrect answer option was written to represent a plausible, real-world supervisor behavior rather than an obviously wrong choice. Per-distractor feedback explains why that specific choice is problematic, not just that it is wrong. This approach increases corrective value and reduces the risk of learners memorizing the correct option without understanding the reasoning.

Certificate of Completion

- The certificate is generated in-browser using the learner's name entered at the start of the module.
- It displays pass/fail status for all six scenarios and a completion date.
- It is printable via the browser's native print function.
- For organizations requiring documented completion records, the module can be adapted to submit completion data to an LMS or external endpoint with minor development.

SECTION 15

Accessibility and Deployment

WCAG 2.1 AAA Compliance

This module was built targeting WCAG 2.1 AAA compliance. The following features were implemented:

- Skip link at the top of every page allowing keyboard users to bypass navigation.
- Full ARIA labels on all interactive elements, groups, lists, and regions.
- Live region announcements for all feedback, navigation events, and state changes.
- Color contrast ratios meeting AAA thresholds across all text and interactive elements. Gold was darkened from display use (#e8a020) to prose use (#c8860a) to meet the 7:1 AAA ratio on white backgrounds.
- Keyboard navigation throughout, including scenario hub cards, choice buttons, and navigation controls.
- Reduced motion support via prefers-reduced-motion media query.
- Focus management on screen transitions, directing focus to the main content area.
- Role and aria-label attributes on all groups, lists, dialogue regions, and form elements.
- Descriptive aria-label text on all scenario cards and choice buttons, readable without visual context.

AAA Limitations to Note

On Audio Narration and Full AAA Conformance

WCAG 2.1 AAA Success Criterion 1.2.6 requires sign language interpretation for all prerecorded audio. Since this module uses text-based narration rather than audio, this criterion does not apply. However, organizations seeking full AAA conformance for learners with reading disabilities may wish to add text-to-speech functionality or recorded narration with captions in a future iteration.

Deployment Options

Method	Requirements	Best For
GitHub Pages	Free GitHub account; public repository	Open access; no LMS; easy sharing via URL
Custom Domain	Domain registrar DNS CNAME record pointing to GitHub Pages	Professional branded URL for client-facing use
SharePoint Embed	SharePoint site; iframe embed web part	Organizations using Microsoft 365 for intranet

LMS (Canvas, Moodle)	URL redirect or iframe; optional SCORM wrapper for tracking	Higher education or corporate LMS environments
Local / Intranet	Web server capable of serving static files	Organizations with restricted networks

SECTION 16

Evaluation Plan

The Kirkpatrick Model provides the evaluation framework for this module. Each level is addressed at a different time horizon.

Level	Focus	Method	Timing
Level 1: Reaction	Did learners find it useful and engaging?	Post-module survey; qualitative feedback from supervisors	Immediately post-completion
Level 2: Learning	Did learners acquire the target knowledge?	Knowledge check scores across all six scenarios; pre/post comparison if baseline available	During and immediately after module
Level 3: Behavior	Did supervisor behavior change on the job?	Coordinator tracking of referral quality and timeliness; supervisor self-report at 60 and 90 days	60 to 90 days post-training
Level 4: Results	Did organizational outcomes improve?	Reduction in accommodation-related complaints; decreased time-to-resolution; audit findings	Annual review cycle

SECTION 17

Appendix: Design Rationale Notes

On the Constant Character of Dr. Patel

Dr. Patel was written as the through-line across all six scenarios to provide a consistent cognitive anchor across very different legal contexts. Research on worked-example design suggests that a familiar expert character reduces extraneous load and helps learners focus on what changes between scenarios rather than re-orienting to new process logic in every module.

On Character Design

Each supervisor character was written to make a different type of plausible mistake: Marcus probes for medical details, Diana delays and goes informal, Greg redistributes duties without documentation, Carmen issues discipline after a disclosure, Rafael discourages the request by citing staffing, and Keisha relies on an unreliable conference room solution. Each mistake is recognizable and non-villainous, which is essential to the identification strategy the module relies on.

On Tone

The warm, lightly humorous tone was selected after considering the compliance training literature on learner resistance. Authoritative and punitive framing increases defensive processing and reduces behavioral transfer. The humor in this module is situational and self-aware rather than trivializing. The legal content is delivered straight.

On Legal Currency

The PWFA became effective June 27, 2023. The PUMP Act became effective April 28, 2023. Both are significantly newer than the ADA and Title VII, and supervisor awareness of these frameworks is often low. Including two PWFA scenarios was a deliberate curriculum decision to address the knowledge gap most likely to generate compliance failures in the near term.

On Institution Neutrality

The module was intentionally designed without organization-specific branding, policy references, or contact information. This reflects a reusability goal. A branded version for a specific institution is a straightforward adaptation requiring replacement of the Brightstead references, addition of a specific Coordinator contact, and optional policy citation in the reference slides.

On Technology Choice

The decision to build in vanilla HTML, CSS, and JavaScript rather than proprietary authoring tools was deliberate. Hand-coded modules are fully transparent, portable, version-controlled, and modifiable by any

qualified developer. They also demonstrate a broader instructional technology competency: the ability to build effective, accessible learning experiences without expensive tooling.

On the Accessibility of This Document

The interactive eLearning module described in this document was built to WCAG 2.1 AA standards with AAA implementation across perceivable, operable, and understandable criteria where applicable to text-based content. This design document, however, is a programmatically generated PDF and does not meet PDF/UA (ISO 14289) or full WCAG accessibility standards. Specifically, it lacks a machine-readable tag structure, formal reading order definition, and screen-reader-associated table headers. Sighted readers will find the document fully navigable. Readers who require an accessible version should contact the designer directly to request an HTML equivalent, which can be produced to full WCAG 2.1 AAA compliance while preserving the visual design of this document.
